Use 160 gr. Cardboard to print. If you can, print the pdo in A3 format! Change the default settings in pepakura from 1 to 0,25 for the fold lines. You get a very good result in Colours if you print it in a copy shop with a digital laser printer!

To give the ship a better look, colour all cut edges! Clue cardboard inside as shown on the pics.

Green lines = Clue **Blue** = Cut **Red Dot** = clue cardboard behind  - important tip
Yellow Dot – Cardboard pice you need later to clue behind a pice.

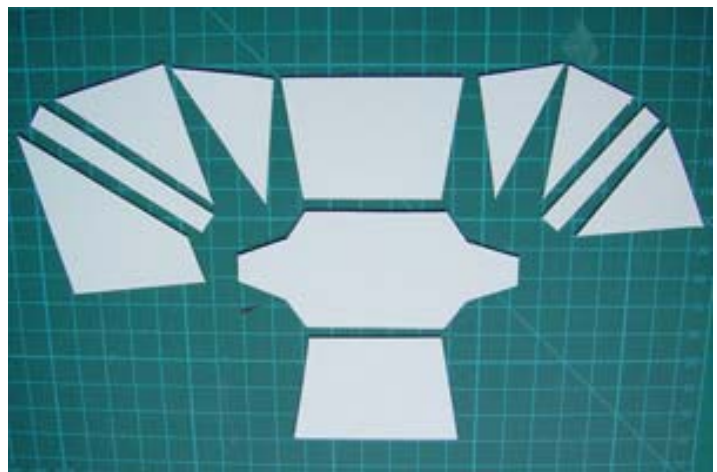

Engine Part

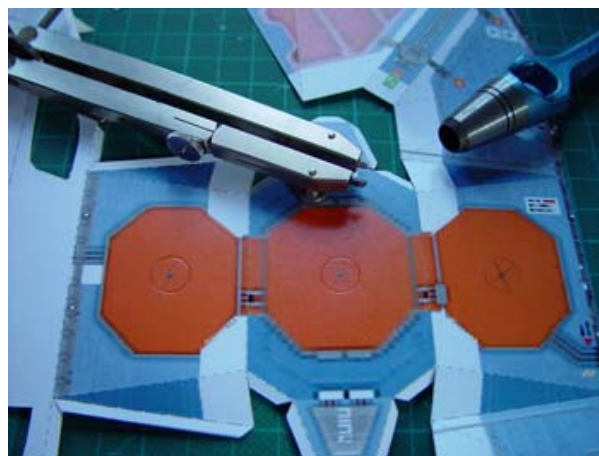

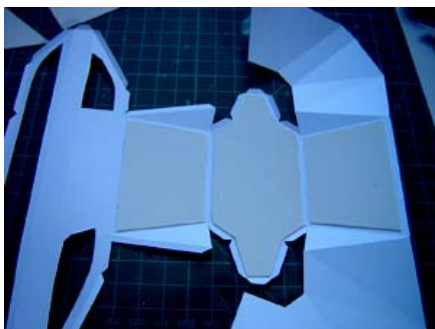

Clue in one step,
then clue cardboard inside

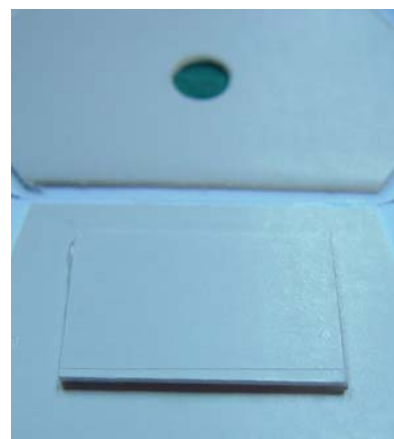

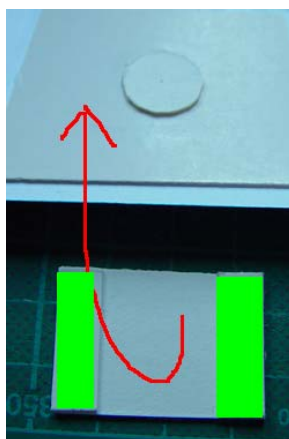

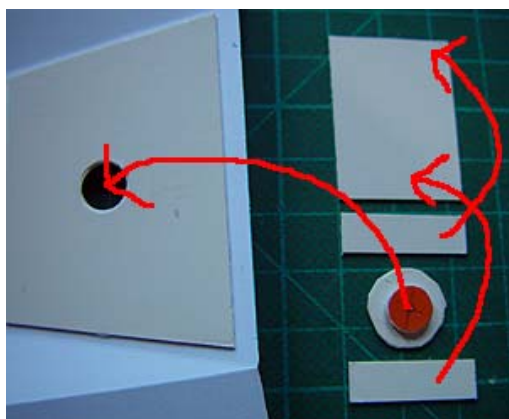

Side Parts with tuneable turrets

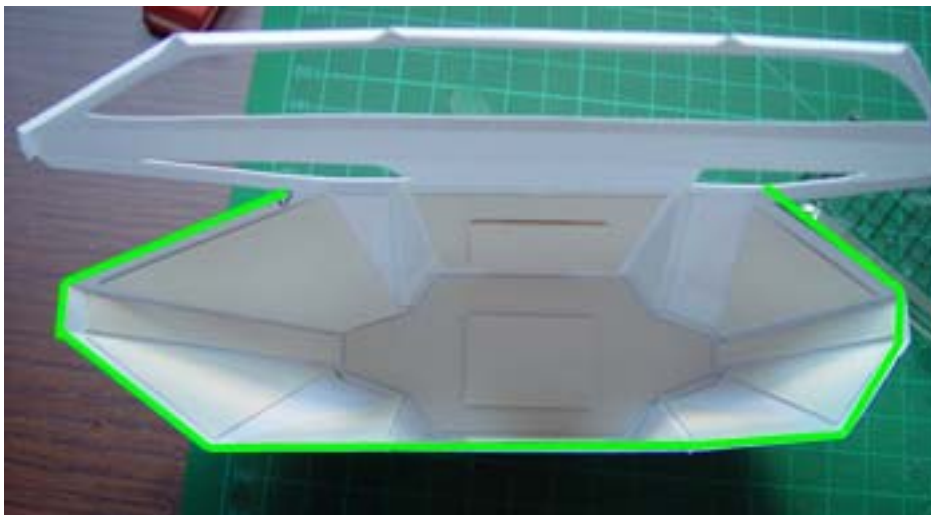

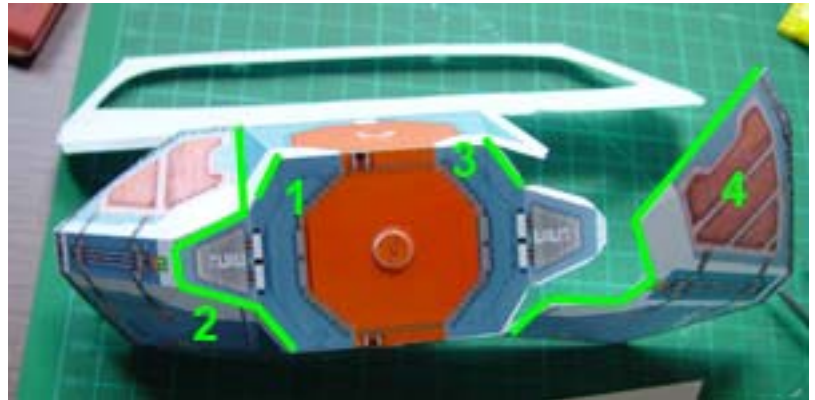

Measuring the middle position for the turrets. Use a spring-bow and a hollow punch for make the holes.

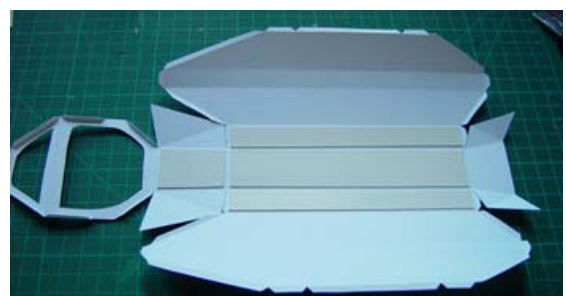

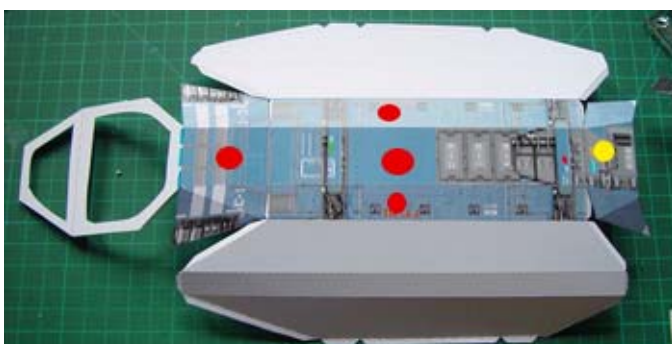

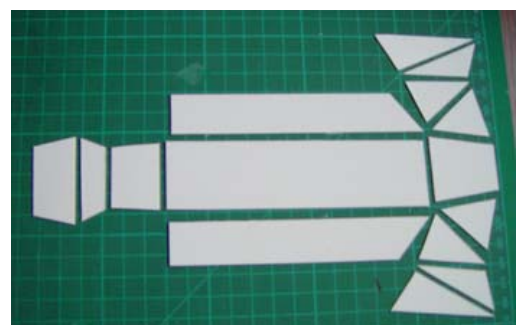

Clue – follow numbers

Clue cardboard behind,
clue in one step.

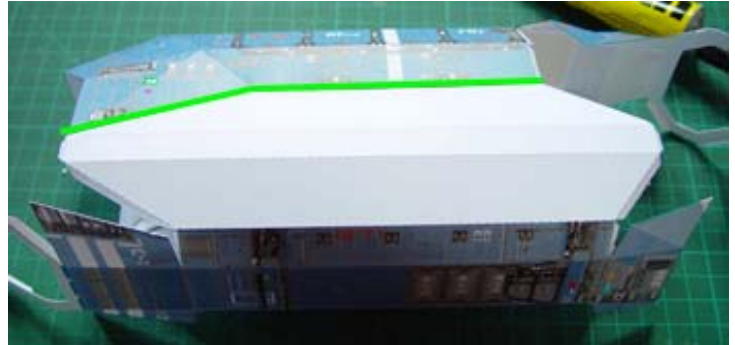

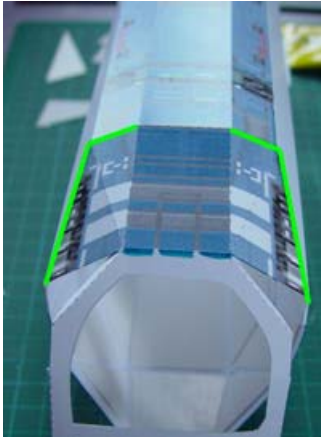

⚠ leave enough
space between
cardboard pices and
edges where you
clue later the flaps of
connector piece in.

Middle Part

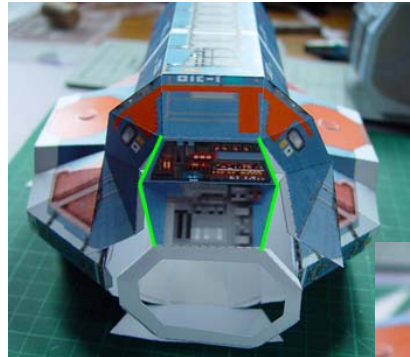

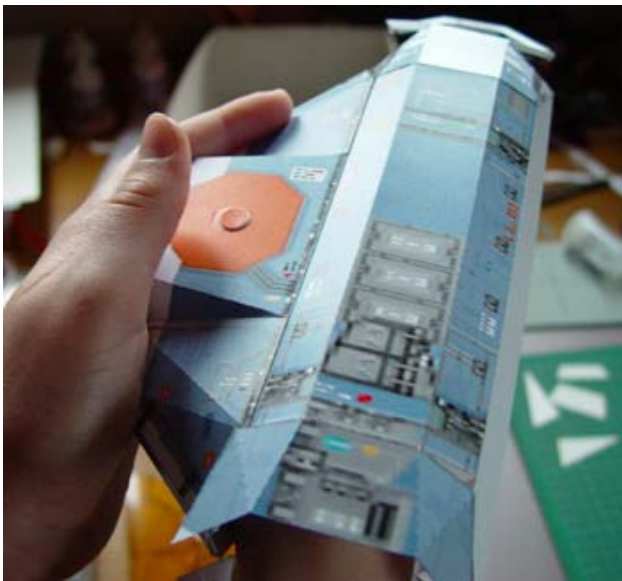

Clue both parts together →

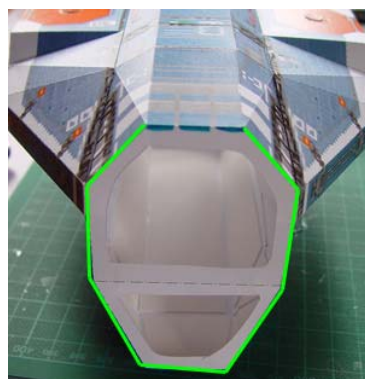

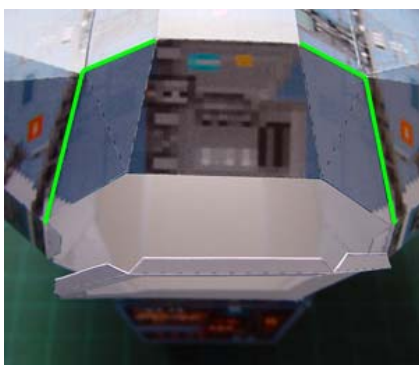

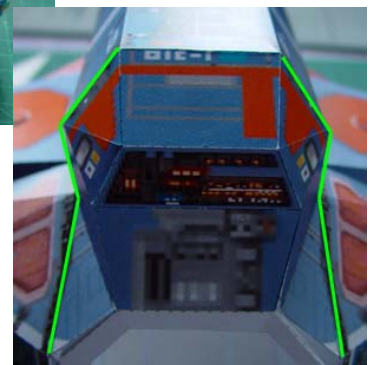

leave enough space between cardboard pieces and edges where you glue later the flaps of the connector pieces in.

Clue side parts to mid part, clue each part in one step.
Wait until its dry!

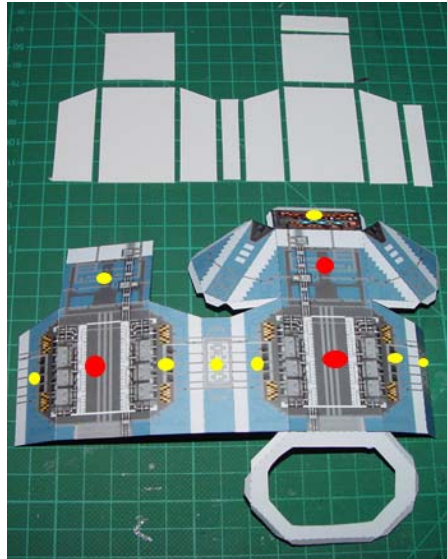

Clue both sides in one step →

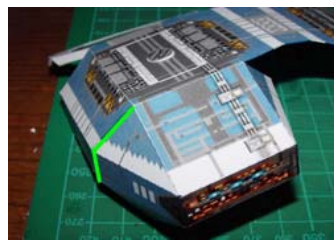

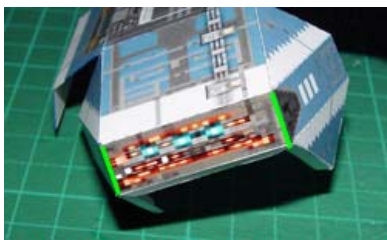

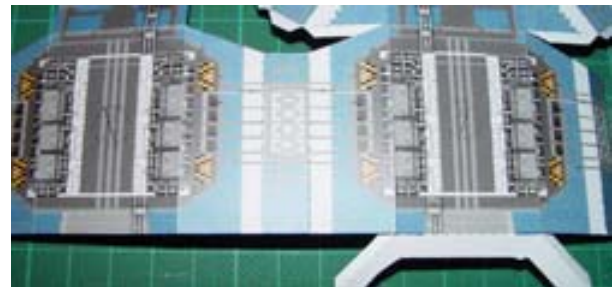

Front Part

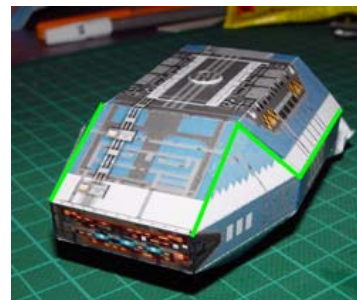

⚠ leave enough space between cardboard pieces and edges where you glue later the flaps of the top and bottom pieces in.

Make turret holes.
Measuring the middle position for the turrets.
Use a spring-bow and a hollow punch for make the holes.

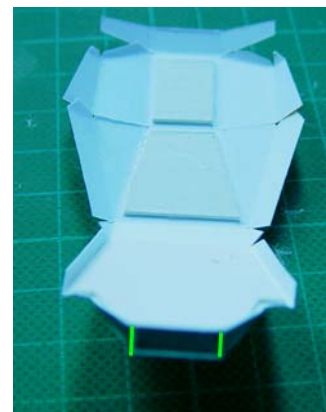

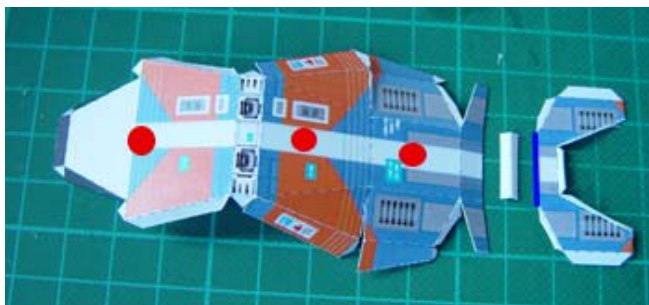

Glue in one step

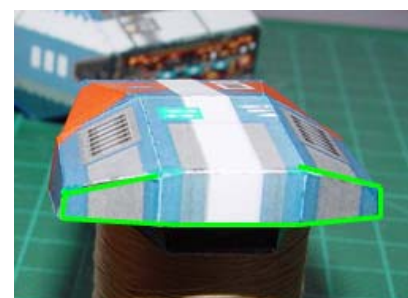

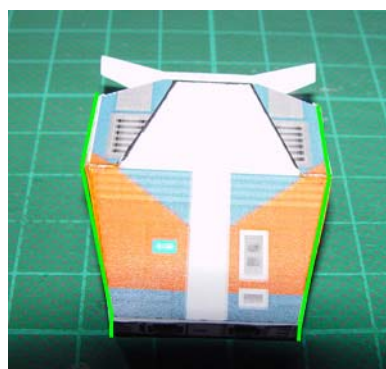

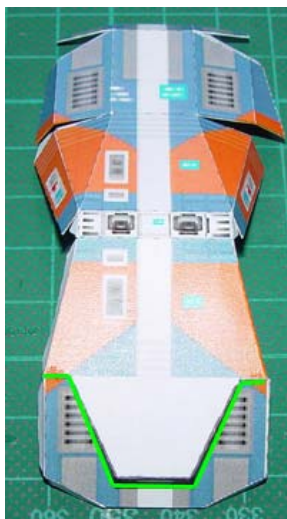

Front Turrets (2x)

Cut and build an extra flap

Glue in one step
